Electronic Governance and Cross-Boundary Collaboration: Innovations and Advancing Tools

Yu-Che Chen (Northern Illinois University, USA)
and Pin-Yu Chu (National Chengchi University, Taiwan)

Although fast growth and innovation characterize electronic governance in the Asia-Pacific region, existing research on e-governance has barely addressed the opportunities and challenges presented by emerging practices in this region.

Electronic Governance and Cross-Boundary Collaboration: Innovations and Advancing Tools will provide research-based policy and management recommendations for innovative e-governance. By focusing on recent developments that will shape the future of e-governance, this book offers an analytical and comparative framework for evaluating and improving e-governance and provides a rich array of models from diverse institutional contexts, focusing on the Asia-Pacific region. Scholars in public administration, public management, and information science can enrich their research on public affairs and e-governance, government agencies and practitioners can learn about the adoption, use, and impact of e-governance, and both groups can use the book to generate sound policy and management decisions for the Asia-Pacific region and beyond.

Topics Covered:

- Continuous Improvement and Impact Assessment
- Cross-Border Interoperability
- Deliberative E-Governance
- E-Governance and Web 2.0
- E-Governance, Integration and Cross-Boundary Collaboration
- Information Sharing and Transparency in Government
- Integration of E-Government Services
- Measuring E-Government Performance
