## Social Development and High Technology Industries: Strategies and Applications

Ahmet Cakir (Institute of Ergonomics, Germany)  
and Patricia Ordóñez de Pablos (University of Oviedo, Spain)

The field of high technology focuses on new, rapidly developing technologies, which include electronic technology, new material technology, new energy technology, bioengineering technology, and communication technology.

**Social Development and High Technology Industries: Strategies and Applications** highlights the relationships between contemporary high technology and social development, the development and application of high technology, high technology competition, and economic development as it pertains to high technology. This book addresses society's growing need to adopt emerging technologies for all aspects of business and economic activity and develop innovative solutions to research problems, which will result in the creation of high performance systems.

### Topics Covered:

- Corporate Structure Based on Social Network Analysis
- Digital Transition
- E-Governance Adoption
- High Technology Industrialization
- Improving Cognitive Load
- International Technology Transfer
- IT and Organizational Structures
- Social Connectedness in Learning
- Technology and Competitive Advantage

ISBN: 9781613501924; © 2012; 427 pp.

Print: US \$175.00 | Perpetual: US \$265.00 | Print + Perpetual: US \$350.00

**Market:** This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

**Ahmet Çakir** is Director of the ERGONOMIC Institute for Occupational and Social Sciences Research Co., Ltd., Berlin, and the Editor-in-Chief of the journal *Behaviour and Information Technology*. He is the Convenor of the ISO-Standardization Committee dealing with computer input devices and workplace organisation. Ahmet Çakir is also the chairman of the German Standardisation Committee on ergonomics in informatics. His research interests focus on computer ergonomics, human reliability and health and safety. He has served as an expert member to the German Nuclear Safety Commission, health and safety authorities, commissions of the German Parliament, and Federal Ministries. Dr. Çakir has published numerous books, research reports, academic papers in refereed journals, and conference proceedings. He has organised and chaired more than 20 national congresses, and two international congresses of the series Working With Visual Displays. Together with Tom Stewart and David Hart, he has written the text book *The VDT Manual* that has been published in five languages.
