Exploring Advances in Interdisciplinary Data Mining and Analytics: New Trends

David Taniar (Monash University, Australia)
and Lukman Hakim Iwan (ICT Division of Bekasi Regency, Indonesia)

Data mining is still a relatively young field, expanding at the rate of technology while advancing tools and techniques for gaining knowledge, finding patterns, and managing databases.

Exploring Advances in Interdisciplinary Data Mining and Analytics: New Trends is an updated look at the state of technology in the field of data mining and analytics. As processor speeds, database size, network capabilities, artificial intelligence, and most fields of hardware and software continue to improve at a staggering rate of increased capability and pace, it is vital for practitioners to stay abreast of the current issues and research in the field. This volume is perfect for IT specialists, data analysts, practitioners and academics alike, offering the latest technological, analytical, ethical, and commercial perspectives on topics in data mining.

Topics Covered:

- Association Rules
- Business Intelligence
- Classification
- Data Aggregation
- Decision Making
- Market Basket Analysis
- Modeling
- Patterns and Pattern Mining
- Regression
- Results Validation

ISBN: 9781613504741; © 2012; 465 pp.

Print: US \$195.00 | Perpetual: US \$295.00 | Print + Perpetual: US \$390.00

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

David Taniar received a PhD degree in databases from Victoria University (Australia, 1997). He is now a senior lecturer at Monash University (Australia). He has published more than 100 research articles and edited a number of books in the Web technology series. He is in the editorial board of a number of international journals, including *Data Warehousing and Mining*, *Business Intelligence and Data Mining*, *Mobile Information Systems*, *Mobile Multimedia*, *Web Information Systems*, and *Web and Grid Services*. He has been elected as a Fellow of the Institute for Management of Information Systems (UK).

Chapter 1

Investigating the Properties of a Social Bookmarking and Tagging Network

Angelova Ralitsa (Max Planck Institut für Informatik, Germany)

Lipczak Marek (Dalhousie University, Canada)

Milios Evangelos (Dalhousie University, Canada)

Pralat Pawel (Dalhousie University, Canada)

Chapter 2

The Dynamics of Content Popularity in Social Media

Papadopoulos Symeon (Aristotle University of Thessaloniki, Greece, and Informatics & Telematics Institute, Greece)

Vakali Athena (Aristotle University of Thessaloniki, Greece)

Kompatsiaris Ioannis (Informatics & Telematics Institute, Greece)

Chapter 3

Detecting Trends in Social Bookmarking Systems:

Wetzker Robert (Technische Universität Berlin, Germany)

Zimmermann Carsten (University of San Diego, USA)

Bauckhage Christian (University of Bonn and Fraunhofer IIS, Germany)

Chapter 4

Mining Frequent Generalized Patterns for Web Personalization in the Presence of Taxonomies

Giannikopoulos Panagiotis (University of Peloponnese, Greece)

Varlamis Iraklis (Harokopio University of Athens, Greece)

Eirinaki Magdalini (San Jose State University, USA)

Chapter 5

An Efficient Method for Discretizing Continuous Attributes

Engle Kelley M. (University of Maryland Baltimore County, USA)

Gangopadhyay Aryya (University of Maryland Baltimore County, USA)

Chapter 6

Dimensionality Reduction with Unsupervised Feature Selection and Applying Non-Euclidean Norms for Classification Accuracy

Saxena Amit (G G University, India)

Wang John (Montclair State University, USA)

Chapter 7

Graph-Based Modelling of Concurrent Sequential Patterns

Lu Jing (Southampton Solent University, UK)

Chen Weiru (Shenyang Institute of Chemical Technology, China)

Keech Malcolm (University of Bedfordshire, UK)

Chapter 8

User-Centric Similarity and Proximity Measures for Spatial Personalization

Yang Yanwu (Chinese Academy of Sciences, China)

Claramunt Christophe (Naval Academy Research Institute, France)

Aufaure Marie-Aude (Ecole Centrale Paris, France)

Zhang Wensheng (Chinese Academy of Sciences, China)

Chapter 9

Estimating Semi-Parametric Missing Values with Iterative Imputation

Zhang Shichao (Zhejiang Normal University and Zhongshan University, China)

Chapter 10

Exploring Disease Association from the NHANES Data:

Xing Zhengzheng (Simon Fraser University, Canada)

Pei Jian (Simon Fraser University, Canada)

Chapter 11

Classification of Peer-to-Peer Traffic Using a Two-Stage Window-Based Classifier with Fast Decision Tree and IP Layer Attributes

Raahemi Bijan (University of Ottawa, Canada)

Mumtaz Ali (University of Ottawa, Canada)

Chapter 12

Constrained Cube Lattices for Multidimensional Database Mining

Casali Alain (Aix-Marseille Université, France)

Nedjar Sébastien (Aix-Marseille Université, France)

Cicchetti Rosine (Aix-Marseille Université, France)

Lakhal Lotfi (Aix-Marseille Université, France)

Chapter 13

ASCCN:

Wan Renxia (North University for Nationalities, China & Donghua University, China)

Wang Lixin (Anhui Institute of Architecture and Industry, China)

Su Xiaoke (Donghua University, China)

Chapter 14

A New Similarity Metric for Sequential Data

Kumar Pradeep (Indian Institute of Management, India)

Raju Bapi S. (Infosys Technologies Limited, India)

Krishna P. Radha (University of Hyderabad, India)

Chapter 15

When Spatial Analysis Meets OLAP:

Bimonte Sandro (Cemagref, France)

Tchounikine Anne (INSA-Lyon, France)

Miquel Maryvonne (INSA-Lyon, France)

Pinet François (Cemagref, France)

Chapter 16

Combining kNN Imputation and Bootstrap Calibrated:

Qin Yongsong (Guangxi Normal University, China)

Zhang Shichao (Zhejiang Normal University, China & University of Technology, Australia)

Zhang Chengqi (University of Technology, Australia)
