## Climate Change, Supply Chain Management and Enterprise Adaptation: Implications of Global Warming on the Economy

Costas P. Pappis (University of Piraeus, Greece)

Mounting scientific evidence shows that Earth's climate is dramatically changing due to the greenhouse emissions caused by human activities, notably by burning fossil fuels for energy production and transport.

**Climate Change, Supply Chain Management and Enterprise Adaptation: Implications of Global Warming on the Economy** aims to provide one among many diverse responses to a growing sense of urgency fed by climate change and experienced by international institutions, governments, local authorities, and enterprises. It provides an interdisciplinary treatment of issues raised by climate change in connection with its implications for society, environment and economy, particularly at the company and the supply chain levels.

### Topics Covered:

- Global warming
- The greenhouse effect
- Climate change evolution
- Global impacts of climate change
- Climate change and supply chain operations
- Climate change adaptation policies
- Climate change mitigation policies
- Business responses to climate change
- Handling uncertainty and risk
- Policy making under climate change
