

Handbook of Research on Energy-Saving Technologies for Environmentally-Friendly Agricultural Development

Part of the Advances in Environmental Engineering and Green Technologies Book Series

Valeriy Kharchenko (Federal Scientific Agroengineering Center VIM, Russia) and Pandian Vasant (Universiti Teknologi Petronas, Malaysia)

Description:

World population growth and the related increase in the demand for food and other goods has intensified agricultural production throughout the world. Some of today's technologies are characterized by relatively low productivity and high consumption of energy resources.

The **Handbook of Research on Energy-Saving Technologies for Environmentally-Friendly Agricultural Development** is a comprehensive research publication that provides insight into new technologies that create efficient and environmentally-friendly energy potential sufficient for the organization of industrial and social-economic activity in rural areas. Highlighting a variety of topics such as economic development, renewable energy, and climate change, this book is ideal for agricultural business executives, engineers, scientists, environmentalists, entrepreneurs, academicians, researchers, students, and those working in the agro-industrial and housing and communal services sectors.

ISBN: 9781522594208

Release Date: July, 2019

Copyright: 2020

Pages: 625

Topics Covered:

- Agriculture
- Biogas
- Climate Change
- Economic Development
- Electric Networks
- Electrical Stimulation
- Electricity Transmission
- Energy Efficiency
- Energy-Saving Technology
- Harvesting Machinery
- Intensification Processes
- Mathematical Programming
- Power Supply Systems
- Renewable Energy

Hardcover: \$295.00

E-Book: \$295.00

Hardcover + E-Book: \$355.00
