Sustainable Logistics and Strategic Transportation Planning

Part of the Advances in Logistics, Operations, and Management Science (ALOMS) Book Series

Tomaž Kramberger (University of Maribor, Slovenia), Vojko Potočan (University of Maribor, Slovenia), Vesna Mia Ipavec (University of Maribor, Slovenia) and Anthony T.H. Chin (Department of Economics at the National University of Singapore, Singapore)

Description:

The tactical organization of resources is a vital component to any industry in modern society. Effectively managing the flow of materials through various networks ensures that the requirements of customers are met.

Sustainable Logistics and Strategic Transportation Planning is a pivotal reference source for the latest research on the management of logistics through the lens of sustainability, as well as for emerging procedures that are particularly critical to the transportation sector.

Readers:

Highlighting international perspectives, conceptual frameworks, and targeted investigations, this book is ideally designed for policy makers, professionals, researchers, and upper-level students interested in logistics and transport systems.
