# Emerging Automation Techniques for the Future Internet

Part of the Advances in Wireless Technologies and Telecommunication Book Series

Mohamed Boucadair (Orange, France) and
Christian Jacquenet (Orange, France)

Description:

Automation techniques are meant to facilitate the delivery of flexible, agile, customized connectivity services regardless of the nature of the networking environment. New architectures combine advanced forwarding and routing schemes, mobility features, and customer-adapted resource facilities used for operation and delivery of services.

Emerging Automation Techniques for the Future Internet is a collection of innovative research on the methods and applications of new architectures for the planning, dynamic delivery, and operation of services. While highlighting topics including policy enforcement, self-architectures, and automated networks, this book is ideally designed for engineers, IT consultants, professionals, researchers, academicians, and students seeking current research on techniques and structures used to enhance experience and services rendered.

ISBN: 9781522571469   **Release Date:** October, 2018   **Copyright:** 2019   **Pages:** 330

Topics Covered:

- Automated Network
- Enterprise Network
- Information Models
- Internet of Things
- Performance Assessment
- Policy Enforcement
- Self-Architectures
- Service Assurance

Hardcover: $195.00
E-Book: $195.00
Hardcover + E-Book: $235.00
