

Therapeutic and Pharmacological Applications of Ethnobotany

Part of the Advances in Medical Diagnosis, Treatment, and Care Book Series

Sara Musaddiq (The Women University Multan, Pakistan), Imama Fayyaz (The Women University Multan, Pakistan) and Kiran Mustafa (Govt. College (W) Khanewal, Pakistan)

Description:

In the intricate tapestry of nature, the potential of kitchen spice seeds remains largely untapped, despite their rich history as sources of natural compounds with diverse benefits. The scientific community faces a challenge in fully comprehending and harnessing the phytochemical, ethnobotanical, and pharmacological dimensions of these seeds, which hold promise in medicine but play pivotal roles in cultural, historical, and culinary spheres.

Researchers, scientists, and enthusiasts find themselves surrounded by a fragmented landscape of knowledge, with limited resources to uncover the hidden potential of kitchen spice seeds. The lack of a cohesive repository that integrates scientific insights with cultural, historical, and culinary perspectives hinders the exploration and understanding of these natural wonders. This fragmented approach impedes progress in unlocking the multifaceted benefits and applications embedded within these seeds.

Therapeutic and Pharmacological Applications of Ethnobotany is an all-encompassing compendium meticulously crafted to bridge these knowledge gaps. By presenting a synthesis of phytochemical analysis, ethnobotanical insights, pharmacological studies, botanical descriptions, industrial and culinary applications, biogenic synthesis, and innovative uses, this book provides a holistic exploration of kitchen spice seeds. Tailored for researchers, scientists, botanists, pharmacologists, ethnobotanists, and culinary experts, it serves as a beacon guiding readers through the scientific intricacies and cultural significances of these seeds, unlocking a wealth of knowledge that transcends disciplinary boundaries.

ISBN: 9798369319864

Pages: 390

Copyright: 2024

Release Date: May, 2024

Hardcover: \$385.00

E-Book: \$385.00

**Hardcover +
E-Book:** \$465.00

Topics Covered:

- Biogenic Synthesis
- Botanical Descriptions
- Culinary Applications
- Detection
- Ethnobotanical Insights
- Health Benefits
- Identification of Plants
- Industrial Applications
- Innovative Applications
- Medicinal Isolation
- Medicinal Properties
- Morphology
- Nanomaterials
- Pharmacological Studies
- Phytochemical Analysis
- Plant Medicine History
- Traditional Uses of Medicinal Plants

Subject: Medicine & Healthcare

Classification: Edited Reference

Readership Level: Advanced-Academic Level
(Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
