

Scholarly Publishing and Research Methods Across Disciplines

Part of the Advances in Library and Information Science Book Series

Victor C.X. Wang (Grand Canyon University, USA)

Description:

There is no singular 'best' method of research. The differing nature of various research endeavors warrant multiple ways of generating knowledge, sharing knowledge, and more importantly, avoiding errors. More recently, the dichotomy between quantitative and qualitative approaches has begun to dissolve as the integrated approach of mixed methods gains popularity.

Scholarly Publishing and Research Methods Across Disciplines is a collection of innovative findings on the methods and applications of research in scholarly publishing, ranging from the analyzation of mixed methods and qualitative/quantitative research, to Dewey's scientific method and more. Highlighting a range of topics including higher education, digital divide, and model development, this publication applies a cross-disciplinary viewpoint that will appeal to researchers, graduate students, academicians, librarians, scholars, and industry-leading experts around the globe seeking an understanding of the limitations and strengths in research techniques.

ISBN: 9781522577300

Release Date: November, 2018

Copyright: 2019

Pages: 380

Topics Covered:

- Book Proposals
- Digital Divide
- Education Research
- Factor Analysis
- Higher Education
- Model Development
- Qualitative Research
- Quantitative and Qualitative Data Gathering
- Scale Development
- Student Researchers
- Survey Research

Hardcover: \$195.00

E-Book: \$195.00

Hardcover + E-Book: \$235.00
