

Machine Learning Techniques for Improved Business Analytics

Part of the Advances in Business Information Systems and Analytics Book Series

Dileep Kumar G. (Adama Science and Technology University, Ethiopia)

Description:

Analytical tools and algorithms are essential in business data and information systems. Efficient economic and financial forecasting in machine learning techniques increases gains while reducing risks. Providing research on predictive models with high accuracy, stability, and ease of interpretation is important in improving data preparation, analysis, and implementation processes in business organizations.

Machine Learning Techniques for Improved Business Analytics is a collection of innovative research on the methods and applications of artificial intelligence in strategic business decisions and management. Featuring coverage on a broad range of topics such as data mining, portfolio optimization, and social network analysis, this book is ideally designed for business managers and practitioners, upper-level business students, and researchers seeking current research on large-scale information control and evaluation technologies that exceed the functionality of conventional data processing techniques.

ISBN: 9781522535348

Release Date: July, 2018

Copyright: 2019

Pages: 275

Topics Covered:

- Artificial Neural Networks
- Big Data Analytics
- Data Mining
- Modeling Techniques
- Portfolio Optimization
- Recommendation Systems
- Risk Behavior
- Social Network Analysis
- Software Security

Hardcover: \$195.00

E-Book: \$195.00

Hardcover + E-Book: \$235.00
