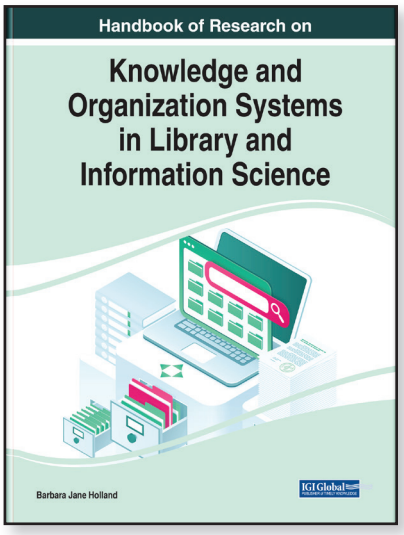
Handbook of Research on Knowledge and Organization Systems in Library and Information Science



Barbara Jane Holland (Brooklyn Public Library, USA (retired) & Independent Researcher, USA)

Description:

Due to changes in the learning and research environment, changes in the behavior of library users, and unique global disruptions such as the COVID-19 pandemic, libraries have had to adapt and evolve to remain up-to-date and responsive to their users. Thus, libraries are adding new, digital resources and services while maintaining most of the old, traditional resources and services. New areas of research and inquiry in the field of library and information science explore the applications of machine learning, artificial intelligence, and other technologies to better serve and expand the library community.

The **Handbook of Research on Knowledge and Organization Systems in Library and Information Science** examines new technologies and systems and their application and adoption within libraries. This handbook provides a global perspective on current and future trends concerning library and information science. Covering topics such as machine learning, library management, ICTs, blockchain technology, social media, and augmented reality, this book is essential for librarians, library directors, library technicians, media specialists, data specialists, catalogers, information resource officers, administrators, IT consultants and specialists, academicians, and students.

ISBN: 9781799872580 **Pages:** 574 **Copyright:** 2021 **Release Date:** June, 2021

Hardcover: $265.00 **E-Book:** $265.00 **Hardcover + E-Book:** $320.00

Topics Covered:

- Artificial Intelligence
- Assistive Technologies
- Augmented Reality
- Blockchain Technology
- Digital Transformation
- ICTs
- Libraries
- Library Management
- Machine Learning
- Remote Work
- Research Trends
- Scalable Services
- Social Media

Subject: Library and Information Science

Classification: Handbook of Research

Readership Level: Advanced-Academic Level (Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
