

Creating a Framework for Dissertation Preparation: Emerging Research and Opportunities

Part of the Advances in Higher Education and Professional Development Book Series

Noran L. Moffett (Fayetteville State University, USA)

Description:

The dissertation processes across various disciplines are considered complicated, tedious, and confusing. The professional community of scholars have contributed monumental works on methodology for specific disciplines; however, none have comprehensively created a framework which addresses these issues.

Creating a Framework for Dissertation Preparation: Emerging Research and Opportunities is a critical research publication that provides relevant lived experiences and frameworks from across various disciplines that support theoretical frameworks and conceptual frameworks of the dissertation process. Featuring a range of topics such as criminal justice, information security, and professional development, this book is ideal for graduate program administrators, deans, department chairs, professionals, dissertation advisors, educators, administrators, academicians, and researchers.
