

# International Journal of Extreme Automation and Connectivity in Healthcare (IJEACH)

**ISSN: 2577-4794; EISSN: 2577-4808**

Established 2019; Published Semi-Annually

**Editor(s)-in-Chief:** Sabah Mohammed (Lakehead University, Canada) and Jinan Fiaidhi (Lakehead University, Canada)

The International Journal of Extreme Automation and Connectivity in Healthcare (IJEACH) is an academic journal for a range of emerging research issues related to the digital transformations in the Healthcare paradigm. Today's world is wired differently compared to the past few years where almost everything can be made ubiquitously. Extreme connectivity enables more universal, global, and close-to-instant communication. These new business models based on these emerging technologies are mainly focused on collecting and connecting health-related data from all available sources, extracting meaningful information from that data, and providing that information to other players. Extreme automation on the other hand can be coupled with extreme connectivity or even with extreme environment, allowing computing systems to control and manage physical processes and respond in ever more "human" ways in highly connected normal environment or a challenging extreme environment. The journal offers a favorable platform for scientists, researchers, students, to make their valuable contributions towards this vital emerging research field.

## Individual Price:

Print: US \$535

E-Journal: US \$535

Print + E-Journal: US \$645

## Institution Price:

Print: US \$1,500

Online Access: US \$1,500

Print + Online Access: US \$1,815

*Prices are subject to change without notification.*

## Topics Covered:

- Ambient Assisted Living
- Artificial Intelligence and Robotics in Medicine and Health Sciences
- Big Healthcare Data Analytics
- Bioinformatics and Biostatistics for Extreme Connectivity
- Clinical Decision Support Systems for Extreme Connectivity
- Cloud Based Healthcare ICT
- Connected Health and Extreme Connectivity
- Cyber-Physical Healthcare Systems
- Data Mining, Knowledge Discovery, and Machine Learning in Medicine for Connected Health
- Data Security and Privacy for Extreme Connectivity
- e-Health Guidelines and Protocols for Emerging Environments
- Electronic Health Records for Extreme Connectivity
- Evaluation and Technology Assessment
- Fault Tolerance in Healthcare Applications
- Health Care Information Systems
- Health Informatics for Extreme Connectivity
- Healthcare Community Empowerment
- Healthcare Interoperability for Extreme Connectivity
- Healthcare Systems for Extreme Environments
- Home-Based eHealth for Connected Healthcare
- Industry 4.0 and Extreme Automation for Healthcare
- Information Management in Connected Healthcare
- Intelligent and Self-Organizing Cellular Networks for Healthcare
- IoT and IIoT for Healthcare
- Linked Data and Semantic Aware Technologies for Healthcare
- Location-Services for Healthcare
- M2M, B2C and B2B Communication
- Medical Devices and Sensors
- Medical Image Processing and Techniques for Extreme Environments
- mHealth, Home Health, and Telehealth
- Mobile Applications for Patient Care
- Ontological Engineering in Medicine and Healthcare
- Simulation and Modeling
- Streaming Data Analytics
- Telemedicine Software, Portals, Devices, and Telehealth for Emerging Environments
- Trustworthy Data Exchange

## SUBMISSION INFORMATION

Prospective authors should note that only original and previously unpublished articles will be considered. Interested authors must consult the journal's guidelines for manuscript submissions at [www.igi-global.com/publish/resources](http://www.igi-global.com/publish/resources) prior to submission. All article submissions will be forwarded to the Editorial Review Board for double-blind, peer review.

All submissions and inquiries should be directed to the attention of:  
**Sabah Mohammed, IJEACH@igi-global.com**
