

Handbook of Research on Social Inequality and Education

Part of the Advances in Educational Marketing, Administration, and Leadership Book Series

Sherrie Wisdom (Lindenwood University, USA), Lynda Leavitt (Lindenwood University, USA) and Cynthia Bice (Miami Dade College, USA)

Description:

In comparing one public school to another, discussions frequently include talk concerning the socioeconomics of a school or district, which then leads to talk about the advantages that one socioeconomic setting has over another. Educators tend to agree that low academic achievement frequently associated with a low socioeconomic status is a characteristic difficult to resolve for a population of school children.

The **Handbook of Research on Social Inequality and Education** is a critical reference source that provides insights into social influences on school and educational settings. Featuring an array of topics including online learning, social mobility, and teacher preparation, this book is excellent for educational leaders, educational researchers, teachers, academicians, administrators, instructional designers, and teacher preparation programs.
