

Economic and Political Implications of Green Trading and Energy Use

Part of the Advances in Finance, Accounting, and Economics Book Series

Ramesh Chandra Das (Vidyasagar University, India)

Description:

Industrial houses have, in recent years, begun to favor green products and financial institutions are funneling investible funds to environmentally friendly industries as a priority. Implementation of green policy to support these changes requires economic as well as political support from various influential countries. Success of green policies will inevitably benefit biodiversity and global environmental health.

Economic and Political Implications of Green Trading and Energy Use is a scholarly research publication that presents global perspectives on the impact of green financing and accounting on the health of the environment while highlighting issues related to carbon trading, carbon credit, energy use, and energy efficiency and their impact on economic outputs. This reference features a range of topics including environmental policies and sustainable development and is essential for academicians, environmental scientists, policymakers, political scientists, students, and researchers.
