

# Handbook of Research on Emergent Applications of Optimization Algorithms (2 Vols.)

Part of the Advances in Business Information Systems and Analytics Book Series

Pandian Vasant (Universiti Teknologi Petronas, Malaysia), Sirma Zeynep Alparslan-Gok (Suleyman Demirel University, Turkey) and Gerhard-Wilhelm Weber (Middle East Technical University, Turkey)

## Description:

Modern optimization approaches have attracted an increasing number of scientists, decision makers, and researchers. As new issues in this field emerge, different optimization methodologies must be developed and implemented.

The **Handbook of Research on Emergent Applications of Optimization Algorithms** is an authoritative reference source for the latest scholarly research on modern optimization techniques for solving complex problems of global optimization and their applications in economics and engineering. Featuring coverage on a broad range of topics and perspectives such as hybrid systems, non-cooperative games, and cryptography, this publication is ideally designed for students, researchers, and engineers interested in emerging developments in optimization algorithms.

ISBN: 9781522529903

Release Date: October, 2017

Copyright: 2018

Pages: 830

## Topics Covered:

- Combinatorial Optimization
- Cooperative Games
- Cryptography
- Game Theory
- Hybrid Systems
- Linear Programming
- Non-Cooperative Games
- Operations Research Games

Hardcover: **\$445.00**

E-Book: **\$445.00**

Hardcover + E-Book: **\$535.00**
