

# The Internet of Things in the Modern Business Environment

Part of the Advances in E-Business Research Book Series

In Lee (Western Illinois University, USA)

## Description:

The industrial internet is a new and upcoming technology that is changing the practices of organizations and corporations everywhere. Through research and application, opportunities can arise from implementing these new systems and devices.

**The Internet of Things in the Modern Business Environment** is an essential reference source for the latest scholarly research on varying aspects of the interworking of smart devices within a business setting and explores the impact of these devices on company operations and models. Featuring extensive coverage on a broad range of topics such as supply chain management, information sharing, and data analytics, this publication is ideally designed for researchers, managers, and students seeking current research on the expansion of technology in commerce.
