

Renewable Energy and Power Supply Challenges for Rural Regions

Part of the Advances in Computer and Electrical Engineering Book Series

Valeriy Kharchenko (Federal Scientific Agroengineering Center VIM, Russia) and Pandian Vasant (Universiti Teknologi PETRONAS, Malaysia)

Description:

Access to power and electricity is a vital resource for businesses and for sustaining the livelihood of consumers. However, producing reliable and renewable energy and distributing it in rural areas can be challenging. Such activities require special technical support measures for organizing a highly efficient and cost-effective production process.

Renewable Energy and Power Supply Challenges for Rural Regions provides innovative insights into energy production, consumption, and distribution in rural regions and examines sustainable and renewable power sources. The content within this publication explores such topics as renewable energy, electrical network, and thermal energy storage. It is designed for electricians, policymakers, state officials, professionals, researchers, and academicians.

ISBN: 9781522591795

Release Date: March, 2019

Copyright: 2019

Pages: 432

Topics Covered:

- Electric Transport
- Electrical Network
- Electrochemical Generator
- Energy Efficiency
- Holographic Films
- Photovoltaic
- Power Supply Systems
- Renewable Energy
- Solar Modules
- Thermal Energy Storage

Hardcover: \$205.00

E-Book: \$205.00

Hardcover + E-Book: \$245.00
