

Theoretical and Practical Approaches to Innovation in Higher Education

Part of the Advances in Higher Education and Professional Development Book Series

Lazarus Ndiku Makewa (Rwenzori International University, Kenya)

Description:

Education badly needs effective innovations that can help produce high-quality learning outcomes across the system. The primary focus of educational innovations should be on teaching and learning theory and practice, as well as on the learner, parent, community, society, and culture. Technology applications need a solid theoretical foundation based on purposeful, systemic research, and a sound pedagogy.

Theoretical and Practical Approaches to Innovation in Higher Education is an essential scholarly publication that outlines the classification of innovations, discusses the hurdles to innovation, and offers ways to increase the scale and rate of innovation-based transformations in the education system. The publication argues that raising the quality and scale of innovations in education will positively affect education itself and benefit society. Highlighting topics such as academic integrity, e-learning, and learner engagement, this book is vital for higher education professionals, academicians, educators, librarians, course designers, researchers, and students.

ISBN: 9781799816621

Release Date: December, 2019

Copyright: 2020

Pages: 270

Topics Covered:
