

Handbook of Research on Globalized Agricultural Trade and New Challenges for Food Security

Part of the Advances in Environmental Engineering and Green Technologies Book Series

Vasilli Erokhin (Harbin Engineering University, China), Tianming Gao (Harbin Engineering University, China) and Xiuhua Zhang (Harbin Engineering University, China)

Description:

Free trade promotes economic growth through international competition and the efficient allocation of resources while also helping to stabilize food supplies between countries that have an overabundance of product and countries that have a shortage. However, sudden price surges can threaten the social cohesion of developing countries and may lead to malnutrition and stunted growth. Balancing trade liberalization and protectionism is imperative for the provision of food security for all.

The **Handbook of Research on Globalized Agricultural Trade and New Challenges for Food Security** is an essential publication that seeks to improve food security, food independence, and food sovereignty in the conditions of globalized agricultural trade and addresses the contemporary issues of agricultural trade including major commodities and food products traded between major countries, directions of trade, and trends. The book also examines the effects of tariff escalations, administrative restrictions, other forms of trade protectionism on food security, and the emerging trade tensions between major actors such as the US, China, the EU, and Russia. Featuring research on topics including plant fertility, dietary diversity, and protectionism, this book is ideally designed for government officials, policymakers, agribusiness managers, stakeholders, international tradesmen, researchers, industry professionals, academicians, and students.

ISBN: 9781799810421

Release Date: October, 2019

Copyright: 2020

Pages: 475

Topics Covered:

- Aquaculture
- Dietary Diversity
- Food Independence
- Multinational Alliances
- Plant Fertility
- Protectionism
- Public Policy
- Seed Production
- Sustainable Development
- Waste Reduction

Hardcover: \$285.00

E-Book: \$285.00

Hardcover + E-Book: \$345.00
