

# Cryptography, Biometrics, and Anonymity in Cybersecurity Management

Mohammed Amin Almaiah (Department of Computer Science, The University of Jordan, Jordan)

Said Salloum (School of Science, Engineering, and Environment, University of Salford, UK)

## Description:

An established understanding of cybersecurity and its counter parts, including cryptography and biometrics, is vital for increasing and developing security measures. As technology advances, it is imperative to stay up to date on the topic in order to increase awareness of emerging cyber threats and malware as well as prevent more sophisticated cyber-attacks. This knowledge can then be used to develop and update malware analysis, privacy-enhancing technologies, and anonymity for defending computers, servers, mobile devices, electronic systems, networks, and data from malicious attacks.

**Cryptography, Biometrics, and Anonymity in Cybersecurity Management** aims to cover all essential topics of cybersecurity and cybersecurity management, with a focus on reporting on cybersecurity security issues and cybersecurity risk management as well as the latest research results, and real-world deployment of security countermeasures. Covering topics such as defense strategies, feature engineering, and face recognition, this book is an excellent resource for developers, policymakers, cybersecurity providers, cybersecurity analysts, forensic scientists, professionals, scholars, researchers, academicians, and more.

**ISBN:** 9798369380147 **Pages:** 512 **Copyright:** 2025 **Release Date:** 5/7/2025

**Hardcover:** \$195 **Softcover:** \$150 **E-Book:** \$195 **Hardcover + E-Book:** \$235

## Topics Covered:

Augmented Ebola Optimization Algorithm  
Autonomous Vehicles  
Cryptographic Algorithms  
Cyber-Attacks  
Dark Web  
Defense Strategies  
Face Recognition  
Feature Engineering  
Image Encryption

Information Security Practices  
Internet of Things  
Intrusion Detection  
Network Topology  
Recovery of Deleted Data  
Secure Transport Systems  
Textual Password Authentication  
Tweeting Platform  
Vulnerability Scanner

**Subject:** Security and Forensics

**Readership Level:** Advanced-Academic Level (Research Recommended)

**Classification:** Edited Reference

**Research Suitable For:** Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
