

Analyzing the Impacts of Industry 4.0 in Modern Business Environments

Part of the Advances in Business Information Systems and Analytics Book Series

Richard Brunet-Thornton (University of Economics, Czech Republic)
and Felipe Martinez (University of Economics, Czech Republic)

Description:

In order to improve competitiveness and performance, corporations must embrace advancements in digitalization. Successful implementation of knowledge management is a huge factor in corporate success.

Analyzing the Impacts of Industry 4.0 in Modern Business

Environments is a critical scholarly publication that explores digital transformation in business environments and the requirement for not only a substantial management change plan but equally the two essential components of knowledge management: knowledge sharing and knowledge transfer. Featuring a broad range of topics such as strategic planning, knowledge transfer, and cybersecurity risk management, this book is geared toward researchers, academicians, and students seeking current and relevant research on organizational knowledge intensity and monitoring of knowledge management development.
