

Strategic Policy-Based Network Management in Contemporary Organizations

Kazuya Odagiri (Sugiyama Jogakuen University, Japan)

Description:

Modern, large organizations are always in need of the most current and up-to-date integrated internet management. This type of technology allows businesses to thrive and succeed at a faster rate than ever before.

Strategic Policy-Based Network Management in Contemporary Organizations is an important professional source for the latest information on internal networks within large companies. Presents security functions, control accesses, user support, and implementation of the DACS Scheme.

Readers:

This book has been designed for practitioners, independent researchers, and business leaders that are involved in an advanced professional setting.
