

Developing Technology Mediation in Learning Environments

Part of the Advances in Educational Technologies and Instructional Design Book Series

Filomena Soares (Polytechnic of Porto, Portugal), Ana Paula Lopes (Polytechnic of Porto, Portugal), Ken Brown (Letterkenny Institute of Technology, Ireland) and Anne Uukkivi (TTK University of Applied Sciences, Estonia)

Description:

Most technologies have been harnessed to enable educators to conduct their business remotely. However, the social context of technology as a mediating factor needs to be examined to address the perceptions of barriers to learning due to the lack of social interaction between a teacher and a learner in such a setting.

Developing Technology Mediation in Learning Environments is an essential reference source that widens the scene of STEM education with an all-encompassing approach to technology-mediated learning, establishing a context for technology as a mediating factor in education. Featuring research on topics such as distance education, digital storytelling, and mobile learning, this book is ideally designed for teachers, IT consultants, educational software developers, researchers, administrators, and professionals seeking coverage on developing digital skills and professional knowledge using technology.

ISBN: 9781799815914

Release Date: December, 2019

Copyright: 2020

Pages: 330

Topics Covered:

- Curriculum Development
- Digital Divide
- Digital Storytelling
- Distance Education
- Instructional Design
- Lifelong Learning
- Mobile Learning
- Web Technologies
- Work Methodology
- Workplace Learning
