

Handbook of Research on Civil Justice

Part of the Advances in Public Policy and Administration Book Series

Elijah Tukwariba Yin (University of Cape Coast, Ghana) and Nelson F. Kofie (Northern Virginia Community College, USA)

Description:

The civil justice system is characterized by a distinct dispute resolution and law enforcement functions, although these functions are not always explicit and their relationship can be vague. People normally turn to this legal system to address an “injustice” situation they encounter. This makes civil justice both socially and economically important, as it may be driven by efficiency or access to justice concerns. The literature suggests that law reform has an uninspiring record in this field. This is because it has, largely, not been considered with a detailed empirically-informed evaluation of proposed solutions. This legal system is complex, and research in this field is correspondingly challenging, interesting, and important.

Handbook of Research on Civil Justice provides significant empirical research findings as well as theoretical reviews and frameworks on a wide array of issues within civil justice and the legal system. This includes topic areas such as access to justice and legal representation, the challenges to developing civil justice, courts and procedures, and civil justice reform. This book is valuable for lawyers, human rights lawyers, court officials, psychologists, social workers, sociologists, consultants, professionals, academicians, students, and researchers working in the field of law, socio-legal studies, sociology, anthropology, political science, social work, social policy, economics, and criminal justice, along with anyone seeking updated information on the current reforms and challenges within the civil justice and legal systems.

ISBN: 9781799878988

Pages: 400

Copyright: 2021
