

Transport and Logistics Planning and Optimization

Part of the Advances in Logistics, Operations, and Management Science Book Series

Jaouad Boukachour (University of Le Havre, France)
and Abdelhamid Benaini (University of Le Havre, France)

Description:

Logistics and transportation are a complex set of entities and systems interconnected by many physical, financial, and information flows, and, as with all systems, there are optimization and planning issues. In addition, they are subject to economic, social, and especially environmental pressures with the need to reduce energy consumption and greenhouse gas emissions. There is a need for original research to address these issues.

Transport and Logistics Planning and Optimization addresses selected transportation and logistics problems at the strategic, tactical, and operational levels in a multidisciplinary approach, not only from a technological perspective but also from a social science perspective. Covering key topics such as supply chain, urban transportation, artificial intelligence, and computer science, this premier reference source is ideal for policymakers, industry professionals, researchers, academicians, scholars, instructors, and students.

ISBN: 9781668484746

Pages: 330

Copyright: 2023

Release Date: June, 2023

Hardcover: \$250.00

Softcover: \$190.00

E-Book: \$250.00

Hardcover + E-Book: \$300.00

Topics Covered:

Agricultural Industry
Artificial Intelligence
Computer Science
Green Logistics
Industry 4.0

Logistics
Mathematical Modeling
Supply Chain
Transportation
Urban Transportation

Subject: Business and Management

Classification: Edited Reference

Readership Level: Advanced-Academic Level
(Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
