

Cyber Security of Industrial Control Systems in the Future Internet Environment

Part of the Advances in Information Security, Privacy, and Ethics Book Series

Mirjana D. Stojanović (University of Belgrade, Serbia) and Slavica V. Boštjančič Rakas (University of Belgrade, Serbia)

Description:

In today's modernized market, many fields are utilizing internet technologies in their everyday methods of operation. The industrial sector is no different as these technological solutions have provided several benefits including reduction of costs, scalability, and efficiency improvements. Despite this, cyber security remains a crucial risk factor in industrial control systems. The same public and corporate solutions do not apply to this specific district because these security issues are more complex and intensive. Research is needed that explores new risk assessment methods and security mechanisms that professionals can apply to their modern technological procedures.

Cyber Security of Industrial Control Systems in the Future Internet Environment is a pivotal reference source that provides vital research on current security risks in critical infrastructure schemes with the implementation of information and communication technologies. While highlighting topics such as intrusion detection systems, forensic challenges, and smart grids, this publication explores specific security solutions within industrial sectors that have begun applying internet technologies to their current methods of operation. This book is ideally designed for researchers, system engineers, managers, networkers, IT professionals, analysts, academicians, and students seeking a better understanding of the key issues within securing industrial control systems that utilize internet technologies.

ISBN: 9781799829102

Pages: 374

Copyright: 2020

Release Date: February, 2020

Hardcover: \$195.00

Softcover: \$150.00

E-Book: \$195.00

Hardcover + E-Book: \$235.00

Topics Covered:

Cloud Security Models
Forensic Challenges
Industrial Security Policy
Industry 4.0
Intrusion Detection Systems

Network Security Architecture
Security Solution Simulators
Smart Grids
Standardization Activities
Test Environments

Subject: Security and Forensics

Classification: Edited Reference

Readership Level: Advanced-Academic Level
(Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
