

Strategies for Business Sustainability in a Collaborative Economy

Part of the Practice, Progress, and Proficiency in Sustainability Book Series

Ramona-Diana Leon (National University of Political Studies and Public Administration, Romania)

Description:

Against the backdrop of globalization, digitalization, and the new entrance of Generation Z on the labor market, the economic environment has started to become more dynamic, complex, and uncertain. New management, marketing, and accounting tools and strategies are needed to improve a company's sustainability in the current collaborative economy.

Strategies for Business Sustainability in a Collaborative Economy is a collection of innovative research that focuses on organizational tools and practices that may foster a company's success in the new economic context, which is defined by the faster pace of technological progress and the entrance of Generation Z on the labor market. Thus, it analyzes how Generation Z transforms human resources policies and practices and how they change the concept of sustainability through their needs and expectations. Highlighting a wide range of topics including resource management, knowledge-based firms, and business models, this publication examines how business models evolve given the success recorded by newer companies. This book is ideally designed for entrepreneurs, executives, managers, economists, academicians, researchers, and students.
