Journal of Information Technology Research (JITR)

ISSN: 1938-7857; EISSN: 1938-7865

Established 2008; Published Quarterly

Editor(s)-in-Chief: Francisco José García-Peñalvo (University of Salamanca, Spain)

The Journal of Information Technology Research (JITR) presents comprehensive interdisciplinary and refereed research on the most emerging and breakthrough areas of information science and technology. The journal seeks to improve and expand existing research in underrepresented areas of information science and technology in all areas of global implication. Through the current trends in the globalization of technology in the knowledge society, JITR will serve to provide the highest in quality concepts, methodologies, trends and case studies for all audiences. The journal focuses on major breakthroughs within the technological arena, with particular concentration on the accelerating principles, concepts and applications of biocomputing, medical informatics, anthropocentric computing, high-performance computing, technological diffusion, predictive analysis tools, genetic algorithms, and cultural informatics. This scholarly resource endeavors to provide international audiences with the highest quality research manuscripts and accounts of the constant evolution of information science and technology in whole. Researchers, academicians, practitioners and students will find this journal as a critical source of reference for all advanced technological applications and developments.

Topics Covered:

- 3-D imaging and printing technologies
- Algebraic biology
- Agricultural informatics
- Anthropocentric computing
- Artificial immune systems
- Artificial intelligence technologies
- Assistive technologies
- Biodiversity applications
- Bioethics
- Bioinformatics/biotechnology
- Biomaterials and nanotechnology
- Biometrics
- Biosensors
- Biosurveillance
- Bioterrorism and situational awareness
- Cellular automata
- Chemoinformatics
- Cloning
- Cloud computing
- Cognitive informatics
- Cultural algorithms
- Cultural informatics
- Diagnostic informatics
- Digital ecosystems
- Digital forensics
- Drug discovery technologies
- Ecological modeling
- Electric vehicle technology
- Evidence-based medicine
- Environmental informatics
- Flexible and adaptive technologies
- Gaming technologies
- Gene therapy
- Genetic algorithms and programming
- Genomics and proteomics
- Green technologies
- Grid computing
- Haptics
- High performance computing
- Health information technologies
- Hemodynamics
- Human-centric and pervasive computing
- Human-computer interface
- Human tracking technologies
- Image and speech recognition
- Internet of Things
- Malware
- Marine technology
- Microarray technologies
- Medical imaging technologies
- Medical intelligence
- Medical informatics
- Mobile technology development
- Multicore technology
- Nanoreactors
- Nanorobotics
- Nanostructures
- Nanotechnology
- Natural computing
- Natural language applications
- Network architectures
- Network technologies
- Open source software
- Optoelectronic technologies
- Pattern recognition
- Predictive analysis tools
- Pharmaceutical informatics
- Quantum informatics
- Radiology technologies
- Sensor technologies
- Social informatics
- Surgical informatics
- Tablet technologies
- Telemedicine
- Telenursing
- Telesurgery
- Tissue engineering applications
- Surveillance technologies
- Virtualization
- Wearable computing
- Wireless technologies

SUBMISSION INFORMATION

Prospective authors should note that only original and previously unpublished articles will be considered. Interested authors must consult the journal's guidelines for manuscript submissions at www.igi-global.com/publish/resources prior to submission. All article submissions will be forwarded to the Editorial Review Board for double-blind, peer review.

All submissions and inquiries should be directed to the attention of:
Francisco José García-Peñalvo, JITR@igi-global.com
