

Establishing and Maintaining Sustainable Career Ecosystems for University Students and Graduates

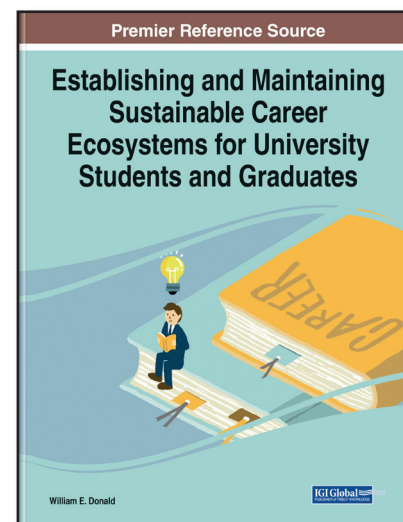

Part of the Advances in Higher Education and Professional Development Book Series

William E. Donald (University of Southampton, UK)

Description:

In today's modern world, students must understand the current business landscape when graduating and applying for jobs. Understanding how to market themselves and what companies look for when hiring is crucial, and they must be prepared for this evolving landscape. Due to this, it is critical to establish a sustainable career ecosystem.

Establishing and Maintaining Sustainable Career Ecosystems for University Students and Graduates draws together the fragmented fields of vocational behavior and human resource management in the context of early-career talent, captures the current state of the landscape and makes suggestions for what opportunities and challenges may lie ahead, and provides a consolidated view of establishing and maintaining sustainable career ecosystems. Covering key topics such as diversity, employability, and career shocks, this premier reference source is ideal for educational professionals, administrators, curriculum developers, business owners, managers, policymakers, researchers, academicians, scholars, practitioners, instructors, and students.

ISBN: 9781668474426
