

Geospatial Technologies in Urban System Development: Emerging Research and Opportunities

Part of the Advances in Geospatial Technologies Book Series

Alok Bhushan Mukherjee (Birla Institute of Technology, India), Akhouri Pramod Krishna (Birla Institute of Technology, India) and Nilanchal Patel (Birla Institute of Technology, India)

Description:

Technological advancements have changed the way we think of traditional urban and spatial planning. The inclusion of conventional elements with modern technologies is allowing this field to advance at a rapid pace.

Geospatial Technologies in Urban System Development: Emerging Research and Opportunities is a pivotal reference source for the latest research findings on the different tools and techniques ranging from mathematical sciences to spatial sciences which can be effective in unveiling the complexity of an urban system. Featuring extensive coverage on relevant areas such as urban traffic, remote sensing, and geographic information systems, this publication is an ideal resource for academics, researchers, graduate-level students, professionals, and policymakers in urban economy, regional planning, and information science disciplines.

ISBN: 9781522536833

Release Date: December, 2017

Copyright: 2018

Pages: 160

Topics Covered:

- Complexity Analysis
- Geographic Information Systems
- Global Positioning Systems
- Remote Sensing
- Soft Computing
- Sustainability
- Urban Traffic

Hardcover: \$145.00

E-Book: \$145.00

Hardcover + E-Book: \$175.00
