and Florian Colceag (Bucharest University of Economic Studies, Romania)**

Description:

In today's society, environmental concerns are at the forefront of entrepreneurial decision-making and planning. With increased attention on an organization's environmental impact, researchers and business leaders strive to provide the best methodologies and strategies for effective environmental reporting and accountability.

Green Accounting Initiatives and Strategies for Sustainable Development presents the latest scholarly research on the economic, social, and environmental objectives essential to the planning and support of future organizations and communities.

This publication features timely, research based chapters on economic, social, and environmental policies including, but not limited to, green performance measurement, triple bottom line reporting, sustainable societies, environmental protection, and risk and adaptive management.

Readers:

This publication is an essential reference source for academicians, researchers, advanced level students, and professionals interested in designing business models and financial plans with consideration for environmental and social liabilities.
