

Next-Generation Wireless Networks Meet Advanced Machine Learning Applications

Part of the Advances in Wireless Technologies and Telecommunication Book Series

Ioan-Sorin Comşa (Brunel University London, UK) and Ramona Trestian (Middlesex University, UK)

Description:

The ever-evolving wireless technology industry is demanding new technologies and standards to ensure a higher quality of experience for global end-users. This developing challenge has enabled researchers to identify the present trend of machine learning as a possible solution, but will it meet business velocity demand?

Next-Generation Wireless Networks Meet Advanced Machine Learning Applications is a pivotal reference source that provides emerging trends and insights into various technologies of next-generation wireless networks to enable the dynamic optimization of system configuration and applications within the fields of wireless networks, broadband networks, and wireless communication. Featuring coverage on a broad range of topics such as machine learning, hybrid network environments, wireless communications, and the internet of things; this publication is ideally designed for industry experts, researchers, students, academicians, and practitioners seeking current research on various technologies of next-generation wireless networks.

ISBN: 9781522574583

Release Date: January, 2019

Copyright: 2019

Pages: 356

Topics Covered:

- Cloud-Support Communications
- Cognitive Radio Networks
- Cooperative/Distributed Coding
- Hybrid Network Environments
- Intelligent Systems
- Internet of Things (IoT)
- Machine Learning
- Telecommunications
- Wireless Communications
- Wireless Sensor Networks

Hardcover: \$195.00

E-Book: \$195.00

Hardcover + E-Book: \$235.00
