Enriching Urban Spaces with Ambient computing, the Internet of Things, and Smart City Design

Part of the Advances in Human and Social Aspects of Technology Book Series

Shin'ichi Konomi (University of Tokyo, Japan) and George Roussos (University of London, UK)

Description:

In recent years, the presence of ubiquitous computing has increasingly integrated into the lives of people in modern society. As these technologies become more pervasive, new opportunities open for making citizens' environments more comfortable, convenient, and efficient.

Enriching Urban Spaces with Ambient Computing, the Internet of Things, and Smart City Design is a pivotal reference source for the latest scholarly material on the interaction between people and computing systems in contemporary society, showcasing how ubiquitous computing influences and shapes urban environments. Highlights the impacts of these emerging technologies from an interdisciplinary perspective.

Readers:

This book is ideally designed for professionals, researchers, academicians, and practitioners interested in the influential state of pervasive computing within urban contexts.
