Mary Maureen Brown (University of North Carolina Charlotte, USA) and  
G. David Garson (North Carolina State University, USA)

Recently, the public sector has given an increasing amount of national and international attention to electronic government systems. Therefore, it is inevitable that the theoretical implications and intersections between information technology and governmental matters are more widely discussed.

**Public Information Management and E-Government: Policy and Issues** offers a fresh, comprehensive dialogue on issues that occur between the public management and information technology domains. With its focus on political issues and their effects on the larger public sector, this book is valuable for administrators, researchers, students, and educators who wish to gain foundational and theoretical knowledge on e-government policies.

### Topics Covered:

- Electronic Government
- Digital Divide
- Project Management
- Public and Sector Management
- Public Policy Environment
- Organizational Behavior

**Market:** This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

**Mary Brown** is an experienced professional with many years of experience in the field of information security and health informatics. She has extensive experience in the health care industry and contributes to security and health informatics education efforts including giving presentations, webinars, and workshops on a variety of related topics. Recent examples include several ISC2 Think Tank webinars on security regulations and application security, and a presentation at the Minnesota Government IT Symposium on the topic of the National Health Information Network. She is involved in a number of IT and information security professional organizations. She was selected as the Minnesota ISSA Security Professional of the Year for 2006 and received the Harold Able Distinguished Faculty award in 2009. Mary Brown has earned CISSP and CISA certifications and has an MS in Information Security. She is currently finishing up a PhD in IT Education with an emphasis in health informatics education. Mary teaches undergraduate courses in information assurance and security and health informatics for Capella University. She is responsible for development of the curriculum and for ensuring that the curriculum provides a complete education that covers the range of skills needed by today's information security and health informatics professionals.
