Video Surveillance Techniques and Technologies

Part of the Advances in Multimedia and Interactive Technologies Book Series

Vesna Zeljkovic
(New York Institute of Technology, Nanjing Campus, China)

Security video surveillance systems, such as homeland security and national defense, rely on specific mathematical algorithms in order to run effectively. It is essential for these parameters to be understood in order to design and create a successful system.

Video Surveillance Techniques and Technologies presents empirical research and acquired experience on the original solutions and mathematical algorithms for motion detection and object identification problems. Emphasizing a wide variety of applications of security systems, this book is an essential tool for graduate students and professionals in the field of signal and image processing applied in static/moving object detection, tracking, and identification.

Topics Covered:

- Video Surveillance
- Automated Video Surveillance Systems
- Automatic Pattern Classification
- Integrated Multimedia
- Moving Object Detection
- Novel Algorithms
- Technological Components

ISBN: 9781466648968; © 2014; 369 pp.

Print: US \$215.00 | Perpetual: US \$325.00 | Print + Perpetual: US \$430.00

Pre-pub Discount:*

Print: US \$205.00 | Perpetual: US \$410.00

* Pre-pub price is good through one month after publication date.

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use.

Dr Vesna Zeljkovic is a researcher in the field of signal and image processing with more than fifteen years of experience, developing mathematical models and novel algorithms for the analysis of images that have applications in video surveillance, analysis of complex optical spectra, public health, homeland security, industry and national defense. This work is reflected in more than 60 published scientific papers, one book chapter, as well as one published book in these fields. She taught engineering courses at undergraduate and graduate level in five countries on three different continents.

Publishing Academic Excellence
at the Pace of Technology Since 1988

Section 1: Moving Object Detection Algorithms

Chapter 1

Illumination Independent Moving Object Detection Algorithm

Chapter 2

Improved Illumination Independent Moving Object Detection Algorithm

Chapter 3

Application of Improved Illumination Invariance Algorithm in Building Detection

Section 2: Moving Object Detection Algorithms and its Applications under Various Conditions

Chapter 4

Multimedia Supported Intelligent Video Surveillance System

Chapter 5

Improved Spatial-Temporal Moving Object Detection Method Resistant to Noise

Chapter 6

Improved Illumination Independent Moving Object Detection Algorithm Applied to Infrared Video Sequences

Chapter 7

Classification of Building Images in Video Sequences

Section 3: Shape Recognition Algorithms

Chapter 8

Shape Recognition Methods Used for Complex Polygonal Shape Recognition

Chapter 9

Nonlinear Diffusion Filters Combined with Triangle Method Used for Noise Removal from Polygonal Shapes

Section 4: Object Identification Algorithms and their Applications

Chapter 10

Algorithms for ISAR Image Recognition and Classification

Chapter 11

Anthropometric Algorithm Used for Automatic Body Dimensions and Skin Color Detection Aimed for Homeland Security Systems

Chapter 12

Algorithm for Automated Iris Recognition Using Biorthogonal Wavelets

Section 5: Video Surveillance Applied in Industry and Quality Control

Chapter 13

Algorithm for Automatic Pattern Classification Designed for Real Metallographic Images

Chapter 14

Algorithm for Monitoring Impact of Intensity of Inert Gas Blowing to Visual Character of Molten Steel Surface

Chapter 15

Algorithm for Petro-Graphic Color Image Segmentation Used in Oil Exploration

Chapter 16

Automatic Object Classification and Image Retrieval by Sobel Edge Detection

Section 6: Video Technology Overview

Chapter 17

Video System Overview

Chapter 18

High Definition Television (HDTV) and Video Surveillance

Chapter 19

New Video Technologies

Chapter 20

Video Surveillance System Design

Section 7: Devices and Applications

Chapter 21

Cameras

Chapter 22

IP Video Surveillance System

Chapter 23

Motion Detectors

Chapter 24

Video Surveillance System Applications
