

Developing In-House Digital Tools in Library Spaces

Part of the Advances in Library and Information Science Book Series

Laura Costello (Stony Brook University, USA) and Meredith Powers (Brooklyn Public Library, USA)

Description:

Library services are dependent on technology tools in order to host, distribute, and control content. Today, many libraries are creating, testing, and supporting their own tools to better suit their particular communities.

Developing In-House Digital Tools in Library Spaces is a pivotal reference source with the latest empirical research on organizational issues, examples of library automation, case studies of developing library products, and assessment of the impact and usefulness of in-house technologies. Featuring coverage on a broad range of topics such as linked data, mobile applications, web analytics, this book is ideally designed for academicians, researchers, students, and librarians seeking current research on technological products and their development in library use.

ISBN: 9781522526766

Release Date: September, 2017 **Copyright:** 2018

Pages: 280

Topics Covered:

- Adaptive Design
- Augmented reality
- Linked Data
- Mobile applications
- Online Learning
- Web analytics
- Web Archiving
