

Examining Multiple Intelligences and Digital Technologies for Enhanced Learning Opportunities

Part of the Advances in Educational Technologies and Instructional Design Book Series

Robert Zheng (The University of Utah, USA)

Description:

Multiple intelligences (MI) as a cognitive psychology theory has significantly influenced learning and teaching. Research has demonstrated a strong association between individual intelligences and their cognitive processes and behaviors. However, it remains unknown how each of or a combination of these intelligences can be effectively optimized through instructional intervention, particularly through the use of emerging learning technology. On the other hand, while efforts have been made to unveil the relationship between information and communication technology (ICT) and individual learner performance, there is a lack of knowledge in how MI theory may guide the use of ICTs to enhance learning opportunities for students.

Examining Multiple Intelligences and Digital Technologies for Enhanced Learning Opportunities is an essential reference book that generates new knowledge about how ICTs can be utilized to promote MI in various formal and informal learning settings. Featuring a range of topics such as augmented reality, learning analytics, and mobile learning, this book is ideal for teachers, instructional designers, curriculum developers, ICT specialists, educational professionals, administrators, instructors, academicians, and researchers.

ISBN: 9781799802495

Release Date: September, 2019 **Copyright:** 2020

Pages: 350

Topics Covered:

- Augmented Reality
- Communication Technologies
- Data Mining
- Digital Natives
- Games
- Learning Analytics
- Learning Objects
- MI Theory
- Mobile Learning
- Multiple Intelligences (MI)
- Virtual Reality

Hardcover: \$195.00

E-Book: \$195.00

Hardcover + E-Book: \$235.00
