

Digital Solutions for Contemporary Democracy and Government

Part of the Advances in Electronic Government, Digital Divide, and Regional Development (AEGDDRD) Book Series

Kelvin Joseph Bwalya (University of Botswana, Botswana) and
Stephen Mutula (University of Kwa Zulu Natal, South Africa)

Description:

The dot-com revolution has brought many advances before unimagined. Of them all, it may be said that none have surpassed e-government in attracting a significant number of researchers and practitioners from around the world. However, the question remains whether everyone is ready to join the e-government movement, or if some are just blindly following the latest trend.

Digital Solutions for Contemporary Democracy and Government touches on several key issues and challenges surrounding the recent e-government boom and offers practical solutions from those who have been a part of implementing e-government programs internationally.

Readers:

This authoritative book is a valuable reference source for professionals, researchers, and students in the field of e-government, information management, or knowledge management.
