

Economic Impact and Recovery Following a Global Health Crisis

Brian W. Sloboda (University of Maryland Global Campus, USA) and Yaya Sissoko (Indiana University of Pennsylvania, USA)

Description:

The COVID-19 pandemic has raised challenges in the assessment of macroeconomic and microeconomic impacts. The impacts of COVID-19 on the macro and micro sectors of the economy and the current and future economic tendencies have yet to be determined. The impact of COVID-19 research holds limitless potential, but the necessary research for professionals to understand the economic impacts is lacking and unclear.

Economic Impact and Recovery Following a Global Health Crisis assesses the economic impacts of the COVID-19 pandemic with a focus on the macroeconomic and microeconomic and uses various statistical methods and real-world data to predict and establish specific trends within the economy. Covering topics such as firm behavior and national economies, it is ideal for policymakers, industry professionals, researchers, academicians, instructors, and students.
