

# Enhancing the Role of ICT in Doctoral Research Processes

Part of the Advances in Library and Information Science Book Series

Kwong Nui Sim (Victoria University of Wellington, New Zealand)

## Description:

Information communication technologies (ICT) have long been important in supporting doctoral study. Though ICTs have been integrated into educational practices at all levels, there is little understanding of how effective these technologies are in supporting resource development for students and researchers in academic institutions.

**Enhancing the Role of ICT in Doctoral Research Processes** is a collection of innovative research that identifies the ways that doctoral supervisors and students perceive the role of ICTs within the doctoral research process and supports the development of guidelines to enhance ICT skills within these programs. While highlighting topics including professional development, online learning, and ICT management, this book is ideally designed for academicians, researchers, and professionals seeking current research on ICT use for doctoral research.

**ISBN:** 9781522570653

**Release Date:** December, 2018

**Copyright:** 2019

**Pages:** 260

## Topics Covered:

- Apps
- Doctoral Research
- Educational Institutions
- ICT Management
- Online Learning
- Plagiarism
- Professional Development
- Researcher Development
- Student Support
- Workshops

**Hardcover: \$185.00.00**

**E-Book: \$185.00.00**

**Hardcover + E-Book: \$220.00**
