

International Journal of Monitoring and Surveillance Technologies Research (IJMSTR)

ISSN: 2166-7241; EISSN: 2166-725X

Established 2013; Published Semi-Annually

Editor(s)-in-Chief: Nikolaos Bourbakis (Wright State University, USA) and Konstantina S. Nikita (National Technical University of Athens, Greece)

The International Journal of Monitoring and Surveillance Technologies Research (IJMSTR) publishes cutting-edge research on monitoring and surveillance technologies. The journal combines multiple disciplines—including engineering, medicine, biology, and computer science—to solve complex problems. As such, the journal promotes hybrid solutions for healthcare, safety, and privacy.

Indexed in:

ET Inspec

Topics Covered:

- Assistive and medical robotics
- Bioengineering for people at risk
- Bio-imaging devices and methods
- Biomarkers and bio-sensors
- Bio-models engineering in bio-medicine
- Body-signaling devices and techniques
- Brain engineering
- Computer assisted intervention systems
- Mobile Healthcare
- Research with microarray technologies
- Surveillance systems and smart homes
- Textile devices
- Wearable and implanted systems and sensors

SUBMISSION INFORMATION

Prospective authors should note that only original and previously unpublished articles will be considered. Interested authors must consult the journal's guidelines for manuscript submissions at www.igi-global.com/publish/resources prior to submission. All article submissions will be forwarded to the Editorial Review Board for double-blind, peer review.

All submissions and inquiries should be directed to the attention of:
Nikolaos Bourbakis, IJMSTR@igi-global.com
