## Description:

Much like different lenses will give a camera a different view, different forms of media portray different aspects of political relations. Without conveyed messages through audiovisual media, individuals would lose those conveyed messages through sub-textual means.

**Universal Codes of Media in International Political Communications: Emerging Research and Opportunities** provides emerging research exploring the theoretical and practical aspects of audiovisual media and applications within political science. Featuring coverage on a broad range of topics such as media representation, political studies, and international communications, this book is ideally designed for policymakers, administrators, and government officials.
