

Handbook of Research on Geospatial Science and Technologies

Part of the Advances in Geospatial Technologies Book Series

Joyce Gosata Maphanyane (University of Botswana, Botswana), Read Brown Mthanganyika Mapeo (University of Botswana, Botswana) and Modupe O. Akinola (University of Lagos, Nigeria)

Description:

The impacts of climate change are beginning to be felt throughout the world, yet there is no clear explanation as to how these changes will alter our future. The research being conducted within the geospatial science field is pivotal to understanding the effects the global environment is experiencing.

The **Handbook of Research on Geospatial Science and Technologies** is an essential scholarly reference source that evaluates the current methodologies and trends in geospatial science, and how these insights provide society with more efficient and effective ways to manage natural resources. Featuring discussions on relevant topics such as cartography, geographical information systems, remotely sensed data, and sustainability management, this publication is an informative resource for all academicians, students, scientists, and researchers that are interested in emerging developments within geospatial science.

ISBN: 9781522534402

Release Date: September, 2017 **Copyright:** 2018

Pages: 500

Topics Covered:

- Cartography
- Chemical Analysis
- Climate Change
- Crowdsourcing Environments
- Data management
- Geographical information systems
- Remotely Sensed Data
- Sustainability Management

Hardcover: \$345.00

E-Book: \$345.00

Hardcover + E-Book: \$415.00
