## Description:

Active political engagement requires the youth of today to begin their journeys now to be leaders of tomorrow. Young individuals are instrumental in providing valuable insight into issues locally as well as on a national and international level.

**Participation of Young People in Governance Processes in Africa** examines the role of young peoples' involvement in governance processes in Africa and demonstrates how they are engaging in active citizenship. There is an intrinsic value in upholding their right to participate in decisions that affect their daily lives and their communities, and the content within this publication supports this by focusing on topics such as good citizenship, youth empowerment, democratic awareness, political climate, and socio-economic development. It is designed for researchers, academics, policymakers, government officials, and professionals whose interests center on the engagement of youth in active citizenship roles.
