

# Powering the Internet of Things With 5G Networks

Part of the Advances in Wireless Technologies and Telecommunication Book Series

Vasuky Mohanan (Universiti Sains Malaysia, Malaysia), Rahmat Budiarto (Albaha University, Saudi Arabia) and Ismat Aldmour (Albaha University, Saudi Arabia)

## Description:

With the rise of mobile and wireless technologies, more sustainable networks are necessary to support such communications. These next generation networks can now be utilized to strengthen the growing era of the Internet of Things.

**Powering the Internet of Things With 5G Networks** is a comprehensive reference source for the latest scholarly research on the progression and design of fifth generation networks and their role in supporting the Internet of Things. Including a range of perspectives on topics such as privacy and security, large scale monitoring, and scalable architectures, this book is ideally designed for technology developers, academics, researchers, and practitioners interested in the convergence of the Internet of Things and 5G networks.

ISBN: 9781522527992

Release Date: August, 2017

Copyright: 2018

Pages: 270

## Topics Covered:

- Autonomous Computing
- Big Data Management
- Cyber Threats
- Disruptive Technologies
- Large Scale Monitoring
- Privacy and Security
- Scalable Architectures
- Wireless Sensor Networks

Hardcover: **\$215.00**

E-Book: **\$215.00**

Hardcover + E-Book: **\$260.00**
