Responsible AI and Ethical Issues for Businesses and Governments

Part of the Advances in Human and Social Aspects of Technology Book Series

Bistra Vassileva (University of Economics - Varna, Bulgaria) and Moti Zwilling (Ariel University, Israel)

Description:

The research surrounding artificial intelligence (AI) is vast and quite diverse in both its applied and theoretical fields. Al tools and techniques, such as machine learning, data mining, neural networks, and advanced analytics, are evolving at a high speed creating a consistent need for updated research. This is especially relevant with frequent developments for the application of AI technology in many science

and industry sectors. This rapid expansion created a need for research that focuses on the questions surrounding the development of AI such as ethical issues, responsible AI methods and applications, and its widespread implementation. Within the answers to these questions is the prevailing notion that AI should be accountable, explainable, transparent, and fair for all organizations and individuals.

Responsible AI and Ethical Issues for Businesses and Governments widens the understanding of AI outside of the "narrow" technical perspective to a broader viewpoint that embraces the links between AI theory, practice, and policy. The chapters in this book discuss the basic philosophical and conceptual foundations of AI and explores the responsible application of AI tools and methods, the moral aspects of AI, practical issues, and responsible AI implementation across a range of industries. While highlighting topics that include digital transformation, ethical competence, information literacy in AI, and the interaction between AI and humans, this book is ideally designed for IT specialists, technology developers, technologists, ethicists, practitioners, stakeholders, academicians, students, and researchers who are interested in learning more about the ethical and responsible use of AI.

ISBN: 9781799842859	Pages: 315	Copyright: 2021	Release Date: October, 2020
Hardcover: \$225.00	Softcover: \$170.00	E-Book: \$225.00	Hardcover + E-Book: \$270.00

Topics Covered:

Accountability Artificial Intelligence Digital Literacy **Digital Transformation** Ethical AI Ethical Guidelines

Subject: Computer Science and Information Technology

Readership Level: Advanced-Academic Level (Research Recommended)

Human and AI Interaction Industry 4.0 Information Literacy Regulation of AI **Responsible AI**

Classification: Edited Reference Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians: Professionals: Practitioners
