

Designing Sustainable Supply Chains to Achieve a Circular Economy

Part of the Advances in Finance, Accounting, and Economics Book Series

Siti Norida Wahab (Universiti Teknologi MARA, Malaysia) and Yanamandra Ramakrishna (Skyline University College, UAE)

Description:

Securing a sustainable supply chain is crucial for business and the future of humanity. Intending to lower waste and carbon emissions, businesses are investing more money in sustainability efforts. However, sustainability measures that might save costs, improve forecasting, and optimize business operations are frequently disregarded, especially during the post-pandemic era.

Designing Sustainable Supply Chains to Achieve a Circular Economy analyzes various approaches and strategies for developing sustainable supply chain capabilities to achieve circular economies; builds and develops models, frameworks, and theoretical concepts by focusing on the role of a sustainable supply chain leading to a circular economy; and provides a platform where new concepts and plans for managing sustainable supply chains in the post-pandemic era with the aid of Industry 4.0 as enablers are discussed. Covering key topics such as tourism, healthcare, transportation, and governance, this premier reference source is ideal for industry professionals, government officials, business owners, managers, entrepreneurs, policymakers, scholars, researchers, academicians, instructors, and students.

ISBN: 9781668476642

Pages: 350
