

# An Excellent Addition to Your Library!

Released: June 2013

## Interdisciplinary Perspectives on Business Convergence, Computing, and Legality

Part of the Advances in E-Business Research (AEBR) Book Series

Reema Khurana (Institute of Management Technology-Ghaziabad, India) and Rashmi Aggarwal (Institute of Management Technology-Ghaziabad, India)

As digital technologies develop, companies envision new ways to incorporate ever more disparate elements in their products, such as the combination of computing power and telecommunications in modern smart phones.

**Interdisciplinary Perspectives on Business Convergence, Computing, and Legality** investigates the development of convergent and interoperable systems in business environments, with a particular focus on potential legal implications that emerge when a company begins branching out into domains traditionally occupied by suppliers and consumers. Business and law professionals—both in academia and in practice—will use this book to gain a greater understanding of the growth of convergence in the field of information technologies and how such transformations affect business practices around the world.

### Topics Covered:

- Cyber Crime
- Data Protection
