

Composites and Advanced Materials for Industrial Applications

Part of the Advances in Chemical and Materials Engineering Book Series

K. Kumar (Birla Institute of Technology, India) and J. Paulo Davim (University of Aveiro, Portugal)

Description:

The design and study of materials is a pivotal component to new discoveries in the various fields of science and technology. By better understanding the components and structures of materials, researchers can increase their applications across different industries.

Composites and Advanced Materials for Industrial Applications

is a critical scholarly resource that examines recent advances in the field of application of composite materials. Featuring coverage on a broad range of topics such as nanocomposites, hybrid composites, and fabrication techniques, this book is a vital reference source for engineers, academics, researchers, students, professionals, and practitioners seeking current research on improvements in manufacturing processes and developments of new analytical and testing methods.

ISBN: 9781522552161

Release Date: May, 2018

Copyright: 2018

Pages: 337

Topics Covered:

- Alkali Modification
- Fabrication Techniques
- Hybrid Composites
- Industrial Construction
- Mechanical Properties
- Nanocomposites
- Natural Fibers
- Natural Fillers

Hardcover: \$225.00

E-Book: \$225.00

Hardcover + E-Book: \$270.00
